SCALABLE & EFFICIENT

The ImageCast® Central is the most **cost-effective system that offers efficiency, scalability and flexibility;** no matter the size or complexity of the jurisdiction.

“The new system has enhanced our ability to deliver efficient elections for the citizens of Denver. We achieved our key objectives, which included innovating the voter’s experience, increasing operational efficiencies, and enhancing transparency.”

*Amber McReynolds, Director of Elections,
Denver Elections Division*

“The choice to utilize the Dominion system has provided our county government and citizens with an efficient solution. The system makes better use of tax payer monies and provides a more robust set of data for result audits.”

*Sheila Reiner, County Clerk, Mesa County CO
Image: Amanda Polson, Elections Director*

The ImageCast® Central is used to tabulate results from all ballots and all voting channels. As ballots are scanned, the system automatically digitally out-stacks ballot images needing review - our Adjudication application then takes over. **The Adjudication application is the digital tool that provides real time efficient multi-user adjudication of ballots, with customer-defined out-stack conditions.**
